

Customer Journey Map

Date	04 July 2026
Team ID	
Project Name	Credit Card Approval Prediction
Maximum Marks	2 Marks

Customer Journey Map

Phase of Journey	Stage 1	Stage 2	Stage 3
Actions <i>What does the customer do?</i>	- Enter personal and financial - Upload required information - Submit the application	- System processes the data - Machine learning model can predicts approval status - User views the prediction result	- Review the prediction - Understand the factors affecting approval - Improve eligibility and apply if needed
Touchpoint <i>What part of the service do they interact with?</i>	- Web Application - Application Form - Input fields	- Prediction page - ML model - Processing screen	- Result page - Recommendation/feedback - Approval status
Customer Thought <i>What is the customer thinking?</i>	"Have I entered all details correctly?" - Will my application be accepted?"	"Is the prediction accurate?" "What factors affect approval?"	"How can I improve my approval chances?" - What should I do next?
Customer Feeling <i>What is the customer feeling?</i>	- Curious - Hopeful	- Interested - Slightly anxious	- Satisfied if approved - Motivated to improve if rejected

Process Ownership <i>Who is in the lead on this?</i>	• Data Analyst • Data Collection Team	• Machine Learning • AI model Developer	• Bank officer • Credit Approval Team
Opportunity <i>How can we improve this stage?</i>	• Collect high-quality data • Remove duplicate and missing values • Update dataset regularly	• Improve model accuracy. • Optimize the Prediction model. • Test and compare multiple ML algorithms	• Provide clear approval/rejected reasons. • Generated detailed reports • Improve user experience and prediction speed
