

Project Demo Planning

Date	04 July 2026
Team ID	
Project Name	Credit Card Approval Prediction
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S. No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction	Introduce the project, objectives, and the problem of predicting credit card application approvals.	2	Hemalatha
2	Dataset & Model Overview	Explain the credit card applicant dataset, preprocessing steps, feature selection, and the machine learning model used.	3	Hemalatha
3	Live Application	Demonstrate the Streamlit application by entering applicant details and predicting whether the application is approved or rejected.	5	Hemalatha
4	Results & Visualizations	Show prediction results, feature importance, data visualizations, and model performance metrics (Accuracy, Precision, Recall, F1-Score).	3	Hemalatha
5	Conclusions & Future Scope	Summarize the project, discuss future enhancements, and answer questions.	2	Hemalatha

Demo Flow Summary:

Step	Activity	Notes
------	----------	-------

1	Introduction & Problem Statement	. Explain why credit card approval prediction is important and define the project objective of assisting financial institutions in making faster and more accurate approval decisions.
2	Solution Overview	Describe the dataset, data preprocessing, feature engineering, machine learning model, and Streamlit interface.
3	Live Feature Demonstration	Enter sample applicant details (or upload a dataset), predict credit card approval status, and display the prediction along with visualizations.
4	Q&A Session	Answer questions about the dataset, machine learning model, evaluation metrics, technologies used, and future improvements.
