

No. of Functional Features Included in the Solution

Date	04 July 2026
Team ID	
Project Name	Credit Card Approval Prediction
Maximum Marks	5 Marks

Functional Features Overview:

This document lists all the functional features included in the project solution. Each feature is described with its purpose, implementation status, and contribution to the overall solution.

S. No	Feature Name	Feature Description	Module / Component	Status (Done / In Progress / Pending)	Marks Contribution
1	User Registration	New user can create an account.	Authentication	Done	Medium
2	User login	Secure login for authorized users.	Authentication	Done	Medium
3	Application Data entry	Enter applicant details such as name, income, age, employee, education, etc	Data input	Done	High
4	Data validation	Validate mandatory fields and input formats	Validation	Done	Medium
5	Credit Card Approval Prediction	Predict whether the application is approved or rejected using ML model	ML prediction	Done	High
6	Prediction Result Display	Show prediction along with confidence score	Result	Done	High
7	Application history	View previously submitted applications and predictions.	Dashboard	Done	Medium
8	Admin Dashboard	Admin can monitor users, applications and system performance.	Admin	Done	Medium

Feature Summary:

Total Features Planned	8
ML features	Credit Card Approval Prediction
CRUD operations	User management, Application management

Metric	Count / Value
--------	---------------

Additional / Nice-to-Have Features	2
Features Tested & Verified	8

Feature Category Breakdown:

S. No	Category	Features in Category	Example Features
1	User Interface (UI)	2	Applicant details form, Credit card Approval Prediction
2	Backend / Logic	3	Flask applications, Credit card approval model loading, Approval prediction processing
3	Database / Storage	1	Credit card applicant dataset(CSV), Trained ML model(.pkl)
4	API / Integration	1	Flask routing between frontend and ML prediction backend
5	Security / Authentication	1	Input validation and secure form submission
